

## Emergency Contraception Campaign Commitment

The individual or organization named below hereby pledges public support to the Wisconsin Family Planning and Reproductive Health Association's Emergency Contraception Campaign:

- 1) to promote knowledge and awareness of emergency contraception to the public and to health care professionals.
- 2) to support the medical, scientific, and legally established principle that hormonal contraception prevents unintended pregnancies and thereby prevents abortions.
- 3) to act within the law to make emergency contraception readily available to victims of rape and to all women in need, and to encourage widespread clinical practice of emergency contraception-in-advance.
